11 June 2024

Sub: Online processing of CCL updation requests for Solar PV Modules

1. The Critical Component List update feature has now been made live for Solar PV Modules. Manufacturers can use this feature to submit Test reports when Bill of Materials for registered modules are changed without change in model no.
2. Licensees are advised to check the correctness of model number on portal prior to submission of online request and any discrepancy may be brought to notice of BIS before online submission.
3. CCL update request, when submitted by licensee, will be placed on records after scrutiny and an intimation would be sent to the Licensee within 5 working days provided all the documentation and conformity of the product is established satisfactory at first instance.
4. Licensee may kindly note that a one-time relaxation has been given to the existing time limit of 90 days for acceptance of tests reports of solar PV modules generated on or after 15 02 2024 which is more than 90 days old. Such requests may be sent to the Dept by email citing the R-No., CRS No., Test request no., Test report no. and date. Only requests received through email within 7 days of issuance of this circular shall be considered for acceptance.
5. This circular issues with the approval of the Competent Authority.
