Sub: Automatic processing of Model Withdrawal and CCL updation

1. In order to provide better service and faster processing of service requests, it has been decided to automate the process for Model Withdrawal and Critical Component List update.
2. Licensees are advised to check the correctness of model number on portal prior to submission of online request and any discrepancy may be brought to notice of BIS before online submission.
3. Model withdrawal / EOL declaration does not absolve licensee/AIR of the responsibility of the product in accordance with BIS Act, Rules & Regulations.
4. Licensee may kindly note that change of source or addition in alternate safety critical components can constitute a CCL update. Any change in PCB layout, circuit, design, rating etc. or any change affecting series guidelines cannot constitute a CCL update. The safety critical components need to comply with existing regulations/guidelines.
5. CCL update request, when submitted by licensee, will be placed on records and an automated intimation would be sent.

The circular has the approval of the Competent Authority.
