Subject: Test Reports from Laboratories under suspension

There are instances for some applications/model inclusions requests where test reports issued by various labs during their period of suspension were not accepted by BIS and these cases could not be processed. For such cases, the applicants (new cases) and registered users (inclusion cases) may submit fresh samples (same model as in the test report not accepted by BIS or new model) for testing to a BIS recognized lab (other than those under suspension/derecognition) and submit the test report to BIS alongwith requisite fee for test report scrutiny(RS 10000/- +applicable taxes for each test report). After receipt of fresh test reports, BIS would process the case in the same file without closing/rejecting the application/inclusion request.
