CENTRAL MARKD DEPARTMENT-3(SDOC)

Ref. CMD-3(SDOC)/CRS/E & IT Goods

17 April 2015

Subject: Extension for implementation of requirements for Plug pins as per IS 1293 up to 13 August 2015 for various products including Power Adaptors

Electronics and IT compulsory registration order 2012 mandates various products including Power Adaptors to comply to IS 13252 (Part1):2010 and IS 616 :2010 .

The provisions under clause 1.5.2 of IS 13252(Part-1):2010 are as follows:

"a component that has been demonstrated to comply with a standard harmonized with the relevant IEC component standard shall be checked for *correct application and use* in accordance with its rating"

clause 15.4.2 of IS 616:2010 states under Note" For any particular plug, care should be taken to check the current edition of any relevant national standard".

Clarifications were sought from BIS by the labs regarding Pins for Socket, Plugs or Plug parts of products with built in devices which was also taken up with Technical Advisory Committee (TAC) under Deity and accordingly mentioned in FAQ issued on 3 March 2015 for clarity.

However representations have been received from Industry Associations to give some time to implement the requirement for dimensions and configuration of Pins as stipulated in FAQ. The matter has again been reviewed by Deity, TAC and BIS and it is decided to extend the implementation of the requirement of dimensions for Pins for Socket, Plugs or Plug parts of products upto 13 August 2015 with the following provisions:

"The requirement for Pins for Socket, Plugs or Plug parts of products with built in devices to comply to IS 1293:2005 shall be implemented w e f 13 August 2015. Till then, such devices otherwise complying to the applicable standards under CRS would continue to be registered. However, such component shall comply with the standard harmonised with relevant IEC component standard and round pins shall only be permitted. The pins of Socket and Plug or Plug part conforming to IS 1293 shall only be accepted after 13 Aug 2015. The registered manufacturer who have not complied to IS 1293 for dimensions and configuration of Pins shall submit the test report from BIS recognised lab to establish the compliance of IS 1293 before 15 Sept. 2015 failing which they will be liable for action as per BIS Act / Regulations / Rules"
